

Spectrum Elektrotechnik GmbH

SMA Push-On male Full Locking

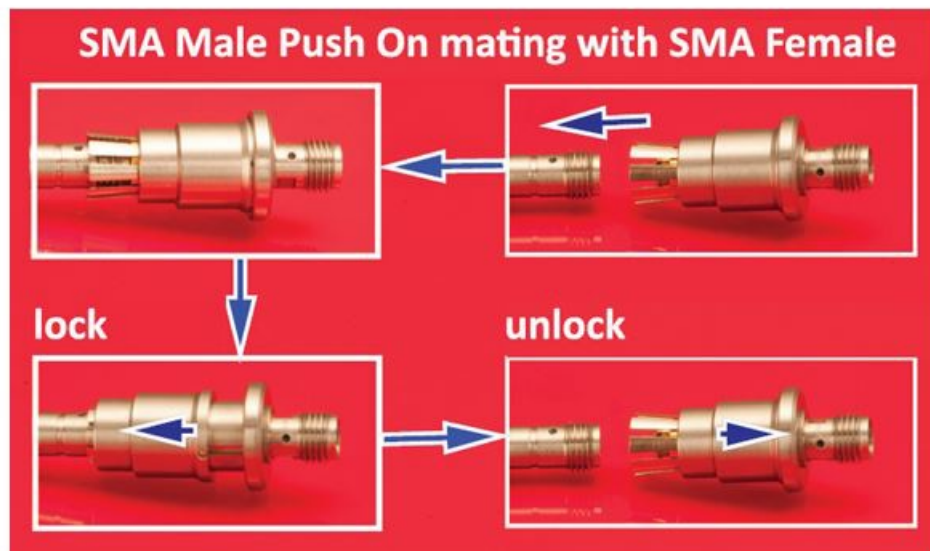

■ SMA Push-on Male Full Locking - Now

Date: 01.10.2021 | Author: | Category: Adapters

Spectrum Elektrotechnik GmbH proudly presents a new product - [SMA Push-on Adapter with full locking 8019-SM21-02](#). The push-on easily slides onto any female SMA, and locks safely, when released. The coupling nut of the push-on, the lock nut, incorporates an intelligent mechanism, developed by Spectrum Elektrotechnik GmbH. To disconnect, simply draw the lock nut back and keep in that position until the push-on connector is removed.

Features of 8019-SM21-02

- ✓ Easily sliding onto any SMA female connector and locking safely
- ✓ Repeatable superior performance, reduced test times and longevity.
- ✓ Quick & easy connection and disconnection

Apart from SMA Push-On Adapters, Spectrum Elektrotechnik GmbH also offers not only a wide range of the other high-quality Push-On Adapters of type 7/16, N, TNC, etc but also a variety of Adapters of different interfaces from standard to customized products. Check it out [here](#).

If you do not find the RF & Microwave Adapters you need for your application, or you need technical support, or information on price and delivery, then please contact your nearest Spectrum Representative or contact our exceptional sales team (sales@spectrum-et.com, +49 (0)89 / 354 804-0) directly for immediate support.
